The Videotron Connection

Eastern Canada remains the hot spot for data centres and tech giants looking for energy-efficiency and reliable infrastructure. We have added the Videotron network to our already vast footprint. That's just another cherry on the sundae of our fibre network exclusively dedicated to businesses. We don't want to brag, but we're big here, and we're also your best option for an entry point to Eastern Canada. A pioneer in commercial broadband connectivity.

Not Your Usual Cliché Provider

From the pre-sales process through to delivery of your service, a dedicated experienced team is assigned to represent your best interests. No rework, no loss of time, no confusing communication, no loss of information, just peace of mind. We are your eyes and ears. And if that wasn't already enough, we provide you with a unified, clear, and concise bill.

Take Your Pick From à la Carte Services

Freedom to pick from customized services that respond to your needs instead of your run-of-the-mill offerings. Videotron Business gives you options above the traditional choices in addition to the different broadband accesses.

Our products

Internet / Ethernet / Connectivity / Dark Fibre / Telephony / Managed services.

As carriers ourselves,
we've already walked
a few miles in your shoes.

We solidify your backbone with our vast
carrier-grade network and dedicated bandwidth.

EPL - EVPL

Ethernet private line, Ethernet virtual Private line

Wavelength

Long-haul between metro regions (Diverse paths
between big cities)

EoD

Ethernet over DOCSIS

DIA

Dedicated Internet Access (Fibre)

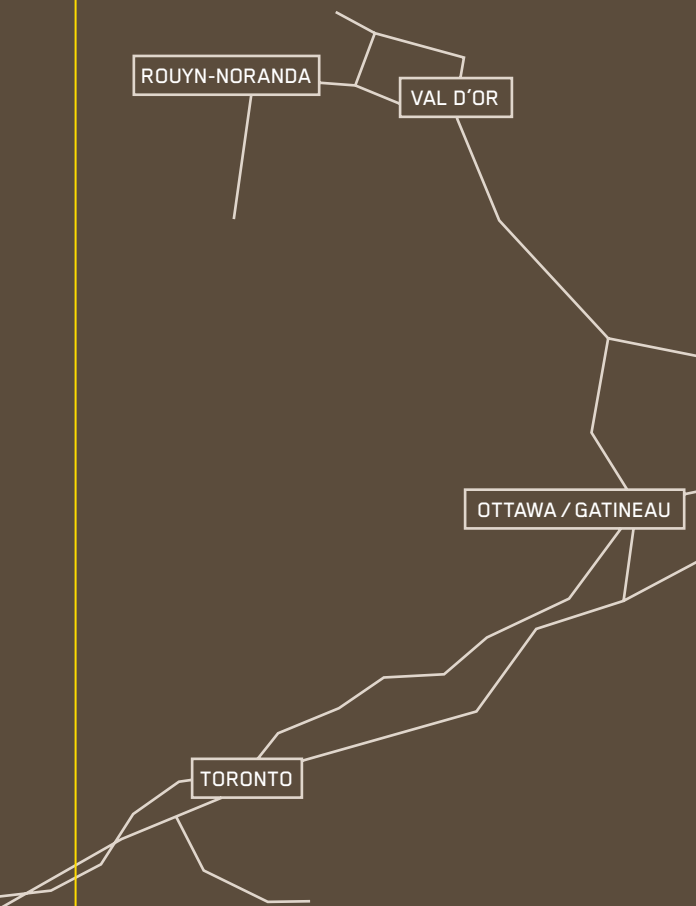

BIA

Broadband Internet Access (Hybrid Fibre)

Dark Fiber

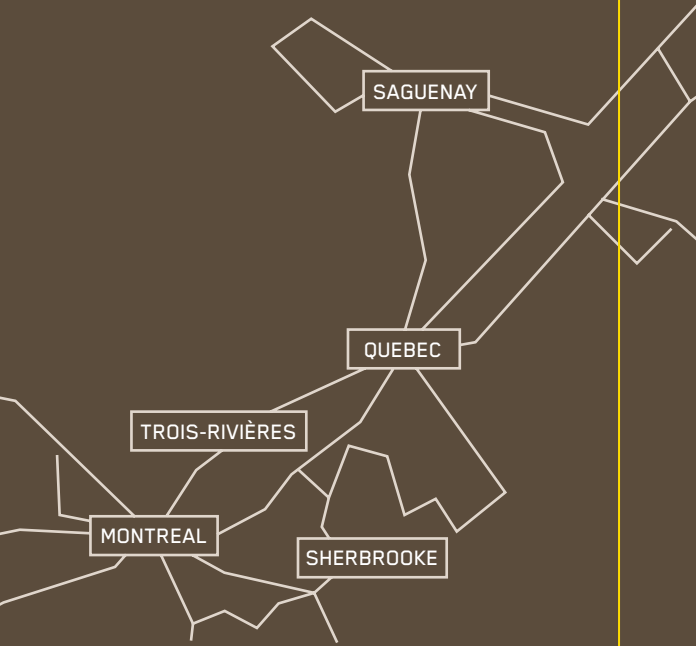

Custom built point-to-point network solution

Multiple major markets across Quebec & Ontario.

52 000
km of fibre

48 000+
km of coaxial cable

60+
datacenters

Diverse paths
for routes

Ethernet Services

EPL, EVPL

- Speeds up to 100Gbps
- Standardized Multi-CoS
- Maximum Service Frame Size 9022 bytes (Jumbo Frame)

Ethernet Over DOCSIS (EOD)

- Hybrid fibre-coaxial technology
- Speeds from 5Mbps/5Mbps up to 200Mbps/30Mbps
- Functional on your existing E-NNI

Internet Services

Dedicates Internet Access (DIA)

- Dedicated fibre optic access
- Symmetrical bandwidth up to 10Gbps
- Committed bandwidth or 95th percentile available
- IP addresses available

Broadband Internet Access (BIA)

- Speeds of up to 400Mbps for downloads and 50Mbps for uploads
 - Unlimited transfer capacity
 - Hybrid fibre network (coaxial cable + fibre)
 - IP addresses available
 - Maximum Service Frame Size 9022 bytes (Jumbo Frame)
-

Transport Services

Wavelength Services

- Wavelength DWDM service between regional markets with speeds up to 100Gbps
- Connections between the most popular datacenters

Dark Fibre Services

- Custom-built network solutions
- Strong and unique expertise in designing, deploying, and operating complete rings with diverse fibre routes
- High fibre counts and density

Telephony Services

Telephony Services

- Specialized Carrier services
- SIP Trunking
- Wholesale PRI's
